

# iSweep

## Sweeping with the innovative worry-free driving coupling!

Thanks to the new form-fitting construction and the use of new self-lubricating sliding materials the reliability and durability of the driving clutch will be increased significantly in comparison with today's well-known and proofed Haaga system. External influences, such as dust, dirt and wetness will not affect the function.

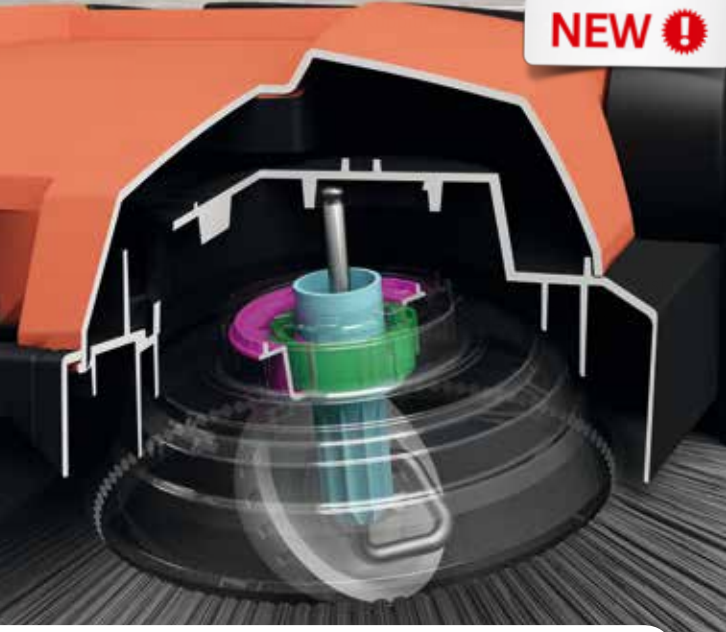

**Your benefits at a glance:**

- dirt resistant
- maintenance-free\*
- robust and durable

\*except wear parts

iSweep is inside in all ProfiLine models 477 up to 697.

**NEW!**

- The specially developed driving clutch ensures high reliability
- Thanks to the form-fitting construction, any kind of external influences, such as dust, dirt and wetness will not affect the function.
- The worm gears (battery driven models) and tooth sleeves are made out of a new self-lubricating sliding material and ensure longer lifetime.

## Quality >> made by Haaga

Haaga Sweeping Systems LLC, which is situated in Kirchheim unter Teck, about 20 km southeast from Stuttgart, is a global company that has been one of the pioneers in its field for well over 45 years. Haaga's main expertise is the development of modern and high-power sweeping machines.

Our products are developed and manufactured with firm conviction exclusively in Germany in order to ensure their top quality. We place a high value on environmentally-friendly and CO<sub>2</sub>-neutral production. In order to keep the customer's travel distance as short as possible, we work with a select

network of dealers. To assist you with operation and for any repairs, we are also here for you at our factory any time you may need us.

## Innovation >> the patented turbo-sweeping system

The patented Haaga turbo-sweeping system was awarded the gold medal and the president's prize of honour at the Inventor Show in Strasburg. Haaga is the only producer of sweeping machines that has ever been awarded such a commendation!

## Haaga >> only good things are copied:

Even our chinese competitors appreciate Haaga's high quality. For this they have been awarded the plagiarius prize.

## The sleek sweepers with the unique disc brush system

**Haaga. The original**

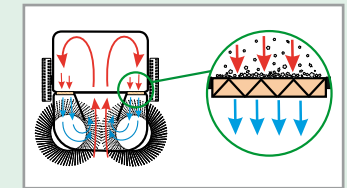

This is how Haaga sweepers earn their special distinction

**The one-of-a-kind disc brush system from Haaga.**  
 Unlike other sweeping devices we rely on our patented disk brush technology. Here two specially-made, opposing circular brushes cut under the waste material and whisk it directly into the waste container.

**Twice the sweeping capacity with Haaga's Turbo sweeping system.**  
 In addition to the disc brush system, our 400 and 600 series machines have an additional fine dirt roller brush that is mounted behind it. This allows these machines to effectively sweep twice with one pass. Even the most fine debris is collected.

**Very low dust thanks to an intelligent airflow.**  
 All of the 400 and 600 series machines (except for the haaga 475) are equipped with two special fine particle filters. The dusty air is cleaned by these filters inside of the machine and then returned

to the sweeping circuit. The user does not stand – as is so often the case – behind the machine in a thick dust cloud.

## The unbeatable characteristics of Haaga sweepers

- Effortlessly sweep up fine and coarse dirt (from sand to beverage cans) – dry or wet.
- Sweep up wet leaves as well, which is especially difficult.
- The disc brushes, which protrude on both sides ensure even greater sweeping performance.
- Easy to push because of beltless drive.
- Additional guide rollers for easy sweeping along curbs and walls.
- The infinitely variable brush height adjustment ensures optimal cleaning performance on various types of surfaces.
- Space-saving storage, without losing any of the collected dirt.

# Haaga 200 series

ideal for home and garden

**Ideal for using at home and in the garden:**

The disc brush system sweeps fine and coarse dirt reliably. Suitable for sweeping velour carpets or low pile rugs whether in hotels or tennis halls.

# Haaga 400 series

for the most heavy-duty jobs

**Double cleanliness because of the turbo sweeping system with two disc brushes and additional fine dirt roller brush:**

The models of the 400 series sweep up everything – from fine sand to beverage cans. Usable indoor and outdoor.

# Haaga 600 series

for professional use

**With battery power... for demanding and professional use:**

No pushing – just guiding. Double sweeping capacity owing to the patented turbo sweeping system. Usable without electric drive, too.

With battery power running time up to 120 minutes

# Haaga 870 series

The all-round sweeping machine

**Ideally for sweeping of snow and rough dirt.**

optional: snow chains and dirt collection container
